*Office swivel chair
for agile working*

Who we are and what we do

Sedus Stoll AG was founded in 1871 and is one of the leading European manufacturers of office solutions. The product range includes seating furniture, such as swivel and visitor chairs, as well as office, conference and contract furniture – all “Made in Germany.”

The company headquarters is located in Dogern on the High Rhine in southern Germany. Another production site is in Geseke, North Rhine-Westphalia. Sedus is a company with a long tradition and more than 150 years of company history that has repeatedly set standards – in terms of ergonomics, manufacturing processes and sustainability. As a synonym for innovation, technology and aesthetics, Sedus constantly enriches the “office world” with new product ideas and contemporary concepts. Sedus puts a strong focus on current trends and changes in the world of work. New organisational structures and forms of work require flexible, aesthetic furnishings and custom-made solutions that enhance collaboration, communication and movement. We place a particular emphasis on ensuring the health and well-being of all who use our furniture.

With our solutions,
we support people
in expressing their
genius at work.

Why se:motion

Ergonomic without any need for adjustment
due to innovative "Kinetic Swing" mechanism

Multifunction armrests
provide relief for neck and shoulders

Perfect support in every position

Working in a co-working space **increases motivation** up to 84%*

Practical changeable upholstery
for backrest and seat in various colours create an individual look

One family concept – one design language:

From focused individual work to team work

se:motion

Teamwork needs freedom of movement

There is just one thing more important than the idea itself: the team who turns it into a reality. The key to success lies in productive cooperation – but how can this be promoted? For example, by creating a working environment in which employees can reach their full potential.

This also requires agile swivel chairs which encourage movement and a slim design which facilitates close exchange – even when seated. The ability to spontaneously roll over to colleagues simplifies collaboration.

For agile workspace concepts:
the slim and lightweight swivel chair
encourages communication and cooperation

DESIGN AND VERSIONS

Keep it simple

Whether in black or pale grey, se:motion exudes a sense of dynamic levity. However, the style is far more than a mere design statement. The perforated backrest not only sets visual accents, but also ensures elasticity and maximum sitting comfort. The same goes for the ideally positioned lumbar curve and the ergonomically designed seat pan with slim edges – the impressive looking design ensures both a good posture and mobility.

The flowing form of the seat rocker, which combines the backrest and seat area, makes se:motion a truly agile companion

Model in pale grey

Model in black

Without the armrests, the swivel chair offers even more freedom of movement

ERGONOMICS AND FUNCTION

Minimal design, maximum mobility

The harmonious design and the generous opening angle of 23 degrees enable relaxed sitting, an upright posture and concentrated working. The seat adapts to the movements associated with the specific work situation and even supports users when leaning up to 5 degrees forwards.

Making mobility simple – in all work situations.

Sedus patented “Kinetic Swing” mechanism

se:motion has an automatic weight adjustment without the need of any additional tedious adjustments required: The higher the user’s weight, the greater the resistance when leaning against the backrest.

Opening angle: 23°
(locking possible)

Backrest
(optional backrest upholstery)

Lumbar support (optional)

2 armrest versions
• Fixed armrests
• Multifunction armrests

Ergonomic seat
(optional seat upholstery)

Height adjustment

Backrest
locking

1. Thanks to the innovative geometry of the seat rocker, se:motion adapts automatically to each user
2. The ergonomically designed seat pan with an elastic edge promotes healthy, active sitting
3. The plastic backrest with its innovative grid design creates a dynamic impression and, at the same time, ensures pleasant air circulation
4. The slimline armrest design dovetails seamlessly into the dynamic overall look and facilitates cooperation when seated
5. The armrest frames are positioned far back so as not to inhibit movement
6. The optional lumbar support strengthens the lower back and ensures ergonomic sitting
7. se:motion can also be configured as a counter version upon request

FORM AND FUNCTION

It's the details which ensure a great design

The structure of se:motion has resulted in a flowing, minimalist design. At the same time, the intelligent details, which are all-important for agile working, are guaranteed to impress. A good posture and comfort are ensured in every sitting position and with every movement.

From the very start of its development, customer benefits were just as important as the eco balance; thanks to a special plastic compound that is particularly easy to recycle as well as practical changeable upholstery for the backrest and seat which can be easily cleaned or replaced if soiled. The result is not just maximum flexibility – but also a great feeling.

The multifunctional armrests are height-adjustable, including sliding pad with floating effect (can be moved forwards and backwards without locking and can be rotated inwards and outwards)

MATERIALS AND COLOURS

Game changer

Changes to corporate identity or the company are not a problem with se:motion, even after procurement. This is made possible by the unique changeable upholstery for the seat and backrest

Backrest upholstery

Seat upholstery

Model

Base

Create a whole new look in minutes with changeable upholstery
se:motion can be given a facelift without the need for tools and the sitting comfort can be increased even further. The changeable upholstery can be easily cleaned or replaced if soiled.

Seat and backrest upholstery (optional)

The optional seat and backrest upholstery can be configured independently of each other and can be selected from the complete Sedus fabric collection

Beautifully combined

A harmonious environment contributes significantly to well-being and productivity. Thoughtfully designed furnishings, pleasant material and surface combinations as well as the choice of colour accents optimally complement the overall appearance. The four colour schemes Smart Balance, Urban Living, Soft Being and Multi Creation can be used to design working environments and suitable se:motion settings.

The colour scheme corresponds to Sedus Multi Creation

Smart Balance

structured, technical, functional, light, reduced, calm

Urban Living

comfortable, respectable, elegant, urban, intense, timeless

Soft Being

gentle, calm, balanced, natural, inviting, regenerative

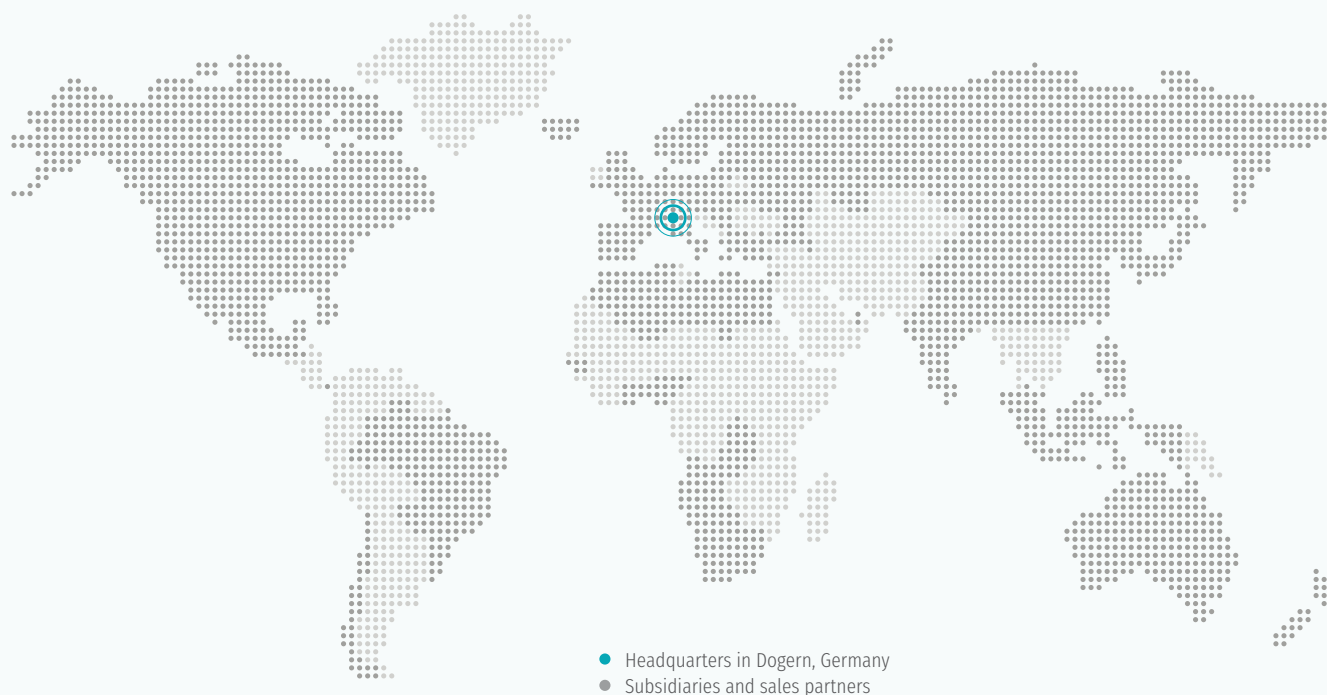

Multi Creation

motivating, inspiring, creative, dynamic, active, open, free
